DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 21-24, drawn to telecommunication service plans, classified in class 379, subclass 121.02.
- II. Claims 11-20, drawn to formatting/processing of billing data, classified in class 709, subclass 220+.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group 1 is directed to determining service plans for a user whereas as group 2 is directed to gathering and processing of billing data or data in general. The subcombination has separate utility such as processing of call detail record.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
